

MOTHER AND DAUGHTER

Cured by Pe-ru-na of Systemic Catarrh.

An Interesting Letter From
Mrs. M. K. Bousch, of
Richmond, and Her Little
Daughter, Pearl.

Mrs. M. K. Bousch, Richmond, Va., writes:

"I had catarrh all through my system for two years and could get no relief. I was advised to try Peruna, and I have taken five bottles of it and am well and better now than I have been for years. I can advise any one who has catarrh of any part of the body to take Peruna. My little girl, who is eleven years old, had catarrh, but was cured by Peruna. Before I began to take Peruna I was sick all the time, but now I am entirely cured and all praise is due Peruna."—Mrs. M. K. Bousch.

Miss Pearl Bousch, writes: "When I was a baby I contracted catarrh, and

was doctored by several good physicians, but none did me any good. My mother was taking Peruna at the time and gave some of it to me, and I soon began to improve, and am now well and fat as a little pig. I am twelve years old. The doctors told mother I had the consumption, but it was only catarrh."—Miss Pearl Bousch.

It is no longer a question as to whether Peruna can be relied on to cure all such cases. During the many years in which Peruna has been put to test in all forms and stages of acute and chronic catarrh no one year has put this remedy to greater test than the past year.

Peruna is the acknowledged catarrh remedy of the age. Dr. Hartman, the compounder of Peruna, has written a book on the phases of catarrh peculiar to women, entitled, "Health and Beauty." It will be sent free to any address by The Peruna Medicine Co., Columbus, O.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

EVERY CHILD BORN INTO THE WORLD with an inherited tendency to distressing, disfiguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disfigurement is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, gentle anointings with CUTICURA OINTMENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-out, worried mothers. A single set is often sufficient to cure when the best physicians fail.

Mexican Mustang Liniment

Over-pleasure is as hard on the muscles and joints as over-work. The best thing to do to get the body right after a long bicycle ride is to rub the sore, stiff parts well with Mexican Mustang Liniment. No better remedy made for bruises, cuts and chafing.

Translator Who Staggered.
A Frenchman was engaged in translating an American novel and came to a description of a man "hitching his horse to a locust." This staggered the translator as he had never heard of the locust tree; but he was equal to the emergency and in explanation stated that "sau-terelles" or grasshoppers grew to an immense size in the United States.

Blot of Printer's Ink.
I wonder if the reading public have any idea of the favors that the press extend without compensation? Have you ever assisted in getting up a church entertainment? Have you ever had occasion to take notices to the papers? Have the newspaper men ever refused to print your articles? Did they ever receive any pay for so doing? Did they ask for any? Were they always polite and pleasant about it?

Mounting a Grindstone.

For ordinary stones, says a Farm and Home correspondent, the frame should be built 18 inches wide, 30 inches high and 36 inches long. Make the ends of 3 by 8-inch stuff and the sides of 2 by 8 inch. Plane it up nicely, bolt it securely together and give it a good coat of paint.

One can buy very good sets of grindstone irons now for 50 cents, including a mandrel roller, bearings and crank. I have one very serious objection to the common grindstone mandrel, and that is that the crank does not screw on, but has a square end, on which the crank does not fit, but flops about "any old way" and very often causes the one who is furnishing the power to bruise or skin his knuckle against the frame.

The first thing I would do with such a mandrel would be to take it to the nearest blacksmith shop, saw the square end off with a hack saw, run

FRAME FOR GRINDSTONE.

a drill through the square hole in the crank and make it round, run a tap through the crank and thread the end of the mandrel. By so doing you have a good, steady, easy-going crank, without any backlash. Fit a piece of wood in the square hole in the stone, find the exact center with your dividers; then bore a hole the size of the mandrel through the block. Use a piece of thick pasteboard on each side of the stone between the iron washer and the stone. Put the stone on the mandrel, observing to use the washers as above, and screw the nut up hard and fast.

Home-Made Milk-Cooler.
Where one does not have sufficient milk to have an elaborate method of keeping it cool, or where such a plan is not warranted, a substitute may be found in the homemade cooler shown this week. Secure a strong box, large enough to hold three or four cans, and line it with zinc to make it water-tight. Have the box high enough so that the water may come to within six inches of the neck of the cans. A rack made of strong strips an inch thick and two inches wide (see Figure 3) is fitted in the bottom of the box, and another rack (see Figure 2) is fitted to the top of the box to prevent the cans from slipping over or upsetting when the box is full

HOME-MADE MILK COOLER.

of water or when one or more cans are removed. The detail shown at Figure 2 shows how this top rack is braced at the corners.—Indianapolis News.

Treatment of Celery.
The first thing to do is to prevent rust and blight, which is readily done by spraying, and this should be done when the plants are not more than two or three inches high. Use bordeaux mixtures applied gently while the plants are small, and make a second application when the plants are six inches high; if a third application is needed, give it regardless of the size of the plants. After the care in spraying or rather along with it comes the cultivation and this, must be done, at least in part, by hand, for the weeds must be kept out of the rows at all cost. Blanching is next in order, and the board process is by far the best, for it enables the plants to get plenty of light, so as to keep up their growth. Place the boards close to the rows of plants holding them in place with stakes. After the plants grow above the height of the boards, bring the latter close together at the top, without bruising the plants, so that the space is dark and the plants will continue to grow.

Raspberry and Blackberry.
Upon the care given the plantations of raspberry and blackberry plants after fruiting largely depends the crops of the next season. Cultivation of the space between the rows and around

the plants should be thorough so that the weeds may be kept in subjection and the moisture in the soil conserved that the canes may make all the growth possible. It is necessary to obtain strong, healthy and well ripened lateral growths during the growing season if the plants are to give a full crop the next season. By keeping up the cultivation the plant is kept growing and the foliage clings until cut off by the frosts in the fall; if cultivation is not done the plant, weakened perhaps by heavy fruiting, is likely to shed its leaves and the new growth of vine is subjected to the warm weather of the late summer.

Broom Corn.
Almost every family has one or more brooms in the house, and very few have any idea where the broom corn comes from, or how it came to be grown here. We may have told before, but it will bear to be repeated, that Benjamin Franklin picked the first seed that were ever planted here from an imported broom, and sent them to a lady friend to be planted. In 1839 the State of Illinois had 95,137 acres in broom corn, and produced 60,665,520 pounds, valued at \$2,357,066 in the hands of the growers. Kansas had 34,383 acres, and the product was 11,813,310 pounds, worth \$458,481. Oklahoma had 12,366 acres and a crop of 3,418,490 pounds, worth \$129,813, and Missouri with 10,219 acres had 3,033,930 pounds, worth \$159,990. It will be seen that the largest acreage does not always produce the largest crop or the most money. Texas had 3,743 acres and a crop of 1,638,150 pounds, worth \$60,313; Arkansas 879 acres, producing 394,609, worth \$12,558, and Indian Territory, 397 acres, with 147,020 pounds, worth \$7,018. There are amounts grown in other States that bring the total crop up to 90,947,370 pounds in 1890, and that was thought a short year, though the yield was probably less in 1900. California, Iowa, Nebraska and Tennessee are among the other States producing broom corn. The value of the broom corn crop averages about \$80 per ton, or \$20 an acre.

Low Farm Wagons.
An enormous amount of force is wasted in loading material into high farm wagons. It is fortunate that this truth is being discovered and lower gears are put into use. This sketch shows a convenient low farm wagon, commodious and light, but strong enough to make loading a very easy matter. The long body has a truss under it to support the middle, the chain being attached well under the body at the front, to avoid the wheels in turning. Side and end pieces can be put upon such a body and a wagon box made if needed. Let the wheels be not only low, but let them have broad rims, so they will not cut into the land when

HOME-MADE LOW-DOWN WAGON.

hauling across the fields.—M. D. Emerson, in Farm and Home.

Government Whitewash.
The United States government uses a whitewash mainly on lighthouses, that is brilliant and durable. Considerable whitewash ought to be used on the farm. Poultry houses may be covered with it inside and out, and it may be used to advantage on fences. The recipe is as follows: Slake one-half bushel of quicklime with boiling water, covering it as soon as the water is applied. When slaked strain it and add a peck of salt, dissolved in warm water, three pounds of ground rice that has previously been boiled in boiling water to a thin paste, half a pound of Spanish whiting and one pound of clean glue, which has been dissolved in warm water, mix well together and let stand for several days. The wash should be applied hot, using a brush or making it sufficiently thin so that it may be applied by a spraying pump.

To Stop a Sucking Cow.
To stop a sucking cow take a piece of half inch basswood six inches long and four inches wide and cut into the shape shown in picture. Put this in her nose. If she does not stop, put sharp nails in, as indicated by dots. If she is cute enough to milk herself ANTISUCKING BOARD, with the nails in, then put on a halter and a surcingle. Fasten a stiff hardwood stick on each side from halter to surcingle, placing the surcingle of course just back of the fore legs. If she is so determined to suck herself that she will throw herself with this harness, I should feed her abundantly upon fat forming foods and visit the butcher.—Rural New Yorker.

Garden Hints.
When getting the window boxes and garden urns ready use good, fresh soil. Nothing is gained, and much may be lost, by economizing in the matter of earth.

If the violets and other spring and autumn bloomers show signs of mildew or mold because of too much rain, cut off close to the ground immediately. The plants will find it easier to make renewed growth than to recover from this creeping and insidious disease.

After all, the scarlet geranium can scarcely be surpassed as a garden standard. It can be set out at any time, and a number of good geraniums will yet save the summer's happiness for the flower lovers whose treasures have suffered from the unusual weather. Let them buy red geraniums and be comforted with vivid bloom.

Had Crazy Spells.
West Pembroke, Me., Sept. 22d. — The 13-year-old daughter of Mrs. A. L. Smith suffered with a peculiar affliction which her mother describes as follows:

"It is two years now since she was first taken with crazy spells.

"They kept on coming at intervals and I could get nothing to do her any good.

"The doctors gave me no encouragement. They all said they could not help her.

"The crazy spell would last about nine days, then she would be well about nine days, but would eat very little and was very yellow. Even the whites of her eyes were yellow.

"I heard that Dodd's Kidney Pills were a great remedy for young girls and decided to try them.

"After taking one box she was completely restored and she has not had one bad spell since. Of course we continued to use the pills and she used altogether five boxes last fall.

"In March I thought I saw symptoms of the spells again and I got six boxes, of which she has taken four, and is in splendid health.

"Her case was certainly a remarkable one, and we are very thankful to Dodd's Kidney Pills for the great good they have done my daughter."

The Holy Ghost Plant.

The Holy Ghost plant, a product of Mexico, Central and South America, is so called because of the shape of the flower which has the appearance of a dove with expanded wings.

HALL'S CATARRH CURE is taken internally. Price 75 cents.

Women Have the Advantage

It has been observed that a man's hair turns gray five years sooner than a woman's.

"Now good digestion waits on appetite, and health on both."

If it doesn't, try Burdock Blood Bitters.

A live pig was attached to a stout hook and used for a bait to tempt a twelve-foot alligator which had been feasting on the innocent little porkers for over a year in a Swamp, Taylor County, Ga. The alligator was captured, although it struggled hard to break the line.

Mrs. Austin's Pancakes will help you to regain that lost appetite. At grocers.

The German government has decided to start a system of motor cars in German East Africa, supplementing the main railway.

No need to fear sudden attacks of cholera infantum, dysentery, diarrhoea, summer complaint of any sort if you have Dr. Fowler's Extract of Wild Strawberry in the medicine chest.

Glasgow has made a profit of \$2,170 on the year's working of its municipal telephone system.
